

# SONOS

THE WIRELESS HiFi SYSTEM

## Sonos Features

---

Sonos is a smart system of HiFi wireless speakers and audio components. It unites your digital music collection in one app that you control from any device.

### Access all the music on earth

- **Pre-loaded Internet radio stations, free of charge**

Get over 100,000 free radio stations, shows, and podcasts, all for free. And you can tune in without turning on your computer: browse for stations, or type in specific call letters or a radio host you love.

- **Endless music from the most popular online music services**

Sonos works seamlessly with Amazon Music, Deezer, iHeartRadio, JB Hi-Fi NOW, JUKE, MOG, Pandora®, Rdio®, Rhapsody®, SiriusXM™, Slacker® Radio, Songza, Spotify®, Stitcher SmartRadio™, Radio by TuneIn, Concert Vault, WiMP, and downloads from any service offering DRM-free tracks. (Service availability varies by region.)

- **Computer-free music playback**

Get instant access to millions of songs and thousands of radio stations without ripping, downloading, or even turning on a computer. Sonos connects directly to these services over the Internet and then streams the music to the rooms of your choice.

- **Play the music on your computer in any room**

Play music stored on up to 16 PCs, Macs or NAS (Network Attached Storage) devices on your home network, supporting the most popular audio formats, from iTunes® to MP3.

## Control your Sonos music system with your smartphone, tablet & more

- **Control all your music and rooms with your Android™ device, iPhone®, iPod touch®, and iPad™**

Free Sonos Controller apps for Android, iPhone and iPad let you control your Sonos players, music on the Internet and your computer right from the palm of your hand. Download the apps for free on the iTunes App Store or Google Play™.

- **Integrated, multi-room control**

If you have multiple music players, you can control what music is playing in every room in your house, from anywhere in your house. Sonos Controllers aren't tied to a specific player, so you can use any Controller to control the music and the volume in all your rooms.

- **Find and play your favourite songs in an instant**

Browse or search for songs and stations, choose the music, and control the volume from anywhere in the home.

- **Wireless connectivity**

Android devices, iPhone, iPod touch, and iPad connect to your Sonos system through your home WiFi network.

- **Includes Sonos Controller for Mac or PC**

Turn any Mac or PC desktop or laptop computer in your home into a Controller. The software is included for free with every Sonos component.

## Simple setup and expandable design

- **Expandable wireless system**

Expand your music system room by room – without adding wires. Add new Sonos components with the press of a single button.

## Automatic software updates

- **New features and music services delivered automatically – and for free**

The Sonos system keeps getting better over time with new features and music services. Once the Sonos music system has been registered, Sonos will automatically notify you when software updates are available. Simply press one button and your system updates itself.
